## Description:

Rocket League is a very simple yet goofy game. It's basically car soccer. That may sound simple, but as you get better, you discover mechanics you didn't even know were possible. You control a rocket powered car, and score more goals than your opponent in the span of 5 minutes. There's a rank system, extra modes, and training packs. It's hard to explain, but the game can get very sweaty. It just went free to play, so I highly recommend.

## Favorite or Least Favorite Part:

My favorite part is probably the rank system. I think it's very unique and exciting when you rank up.
