Experience with the resource:

My experience with the online resource was very good! I was able to learn about the history of regents exams. I learned what classes are required to take the regents exams like me. I have to take a math and science regents so I learned how long my two regents have been going on for. I have seen all the classes in my future that will be need a regents exam to be completed. This website will definitely be pulled up and used again when I need to make my next schedule! Its very helpful.
