

ONLINE RESOURCE REVIEW

Resource: Delta Math
Subject Used For: Math
Ease of Use: 4/5
Helpfulness: 4/5
Likeliness to Recommend: 4/5

Experience with the resource:

Delta math is an online resource to help students guide themselves as their doing math homework. My experience doing delta math is good. While i am doing my homework on delta math it is more than that, it is like having a teacher by your side with you. Delta math on all the questions has a help video that can guide you through some of the similar problems. I find this very helpful because i can copy down notes and get a better understanding of the problem type. Furthermore, for each question there are example problems which shows the steps and the answers to again similar problems. This really helped me as well because i can look at examples to see if i was doing the work correctly for certain typed problems. Delta math guides you through your work and allows you to know and be successful in your math homework.
