Go to the App Store and download the Cricut Design Space App
Once downloaded, create or sign into your Cricut account.

Once signed in,
You have to connect the Cricut.
Plug in the machine and follow the instructions to connect.

Design Space is a grid that matches your mat. It will look like this.
Once here, you can add any images or text that you would like to design with the Cricut.
Using HTV (Heat Transfer Vinyl) Iron On

Prepping the HTV to Press:
Lay the HTV sheet on a mat and press it down to ensure that it is fully adhered to the mat. The transfer sheet should be lined up with top left corner of the mat. Cut the HTV with any of the Cricut cutting machines.

Cutting HTV with the Cricut:
Save your design and then click on Make It. Make sure to cut it out in a mirror setting. Click the toggle so the mirror setting is on. Select Iron On as your material in the drop down settings.

Weeding the HTV:
Weed out the words, images and edges. There should be a bottom layer of plastic that sticks out of both sides.

Applying HTV to the Material:
Once the images are weeded, it’s time to apply them on to the items. Center the image, then press it down really well. The plastic backing is sticky so it will stick to the item.
Using the EasyPress:

   - For flat base materials: find a flat, heat-resistant surface. Use EasyPress mat to protect surface.
   - Be sure to avoid flimsy ironing boards!

2. Set timer & temperature.
   - Use the Cricut Heat Guide to determine project settings. cricut.com/heatguide
   - Press timer, then use +/- buttons to set recommended time. Cricut Heat app can send settings directly to Cricut EasyPress 3.
   - Press temperature, then use +/- buttons to set recommended temperature. Cricut Heat app can send settings directly to Cricut EasyPress 3.
   - Orange lights mean it's heating up.
   - Green lights mean temperature has been reached. Beep sounds when it's ready.

3. Preheat base material.
   - Place Cricut EasyPress on fabric for recommended time.

4. Position design.
   - Make sure shiny side (clear liner) is facing up.

Cricut Heat App:
Set custom time & temp

Open Cricut Heat app.
Under My Heat Presses, select the Cricut EasyPress 3 and scroll to the Set Custom Time & Temp option.

Change the Temperature and Press time as desired. You can also select options to Preheat Blank and Flip & Press when pressing blanks that require these steps. When you're finished, select Send Settings to EasyPress.

Quick Tips!

- Always use Cricut EasyPress at room temperature.
- Before using Cricut EasyPress ensure that fabrics and other base materials are completely dry.
- Always return Cricut EasyPress to its Safety Base when not in use.
- Before using Cricut EasyPress, ensure there is no tape or protective film over its control panel.
- Make sure you mirror your image before cutting it with the Cricut when using iron-on or infusible ink.
Using the Cricut Heat App

Once signed in with your Cricut account, you will need to set up the press.

Select the set up option to begin activating the device. Select the unit from the list of available Heat Presses, and tap Connect.

The Cricut Heat app will show ‘Connecting to Easy Press 3’ with the Bluetooth logo.

The app will ask to confirm the activation of Cricut EasyPress 3. Select the box to accept Cricut Terms of Use and Privacy Policy and tap Activate.

Cricut Heat will show a status bar as it is activating Cricut EasyPress 3. When complete, you will see a Success! message indicating the press is set up and ready to use! Cricut EasyPress 3 will begin to heat up and can be used with Cricut Heat app or on its own.

Send recommended time & temp settings to Cricut EasyPress 3

Open the Cricut Heat app.

Select your transfer material and the base material to which you will apply it, then select Next.
Once all selections have been made, select Send Settings to EasyPress and follow the on-screen prompts to finish the project!

5.) Apply Heat.
- Place Cricut EasyPress on base material, then press Go button to start timer.
- Hold Cricut EasyPress in place and apply recommended pressure.

6.) Before removing carrier sheet, refer to the Cricut Heat Guide or Cricut Heat App for peel temperature instructions.

The timer will start and you will use the press to put the image on your item!
